# Problem of the Week
Problem B
The Puzzler Returns

Our superhero The Puzzler is back, seeking your help once more to solve the following number puzzle.

Place each of the numbers 2, 3, 4, 5, 6, 7, 8, 9, and 10 in a different circle in the diagram so that each line of three circled numbers has the same sum.

Can you find more than one possibility for the number that can go in the middle circle?
